

PATIENT TESTIMONIALS²

The procedure was very good as compared to some of the other procedures that I have had and it was relatively painless. Following the procedure, **I now see no jowls whatsoever.** I see a softening of what I call “tiger stripes” and a lessening of the folds around my mouth. **It’s one of the best procedures I have ever done.**

R.Y. United States

My skin is definitely tighter. I had a real laxity problem and I had been through all kinds of treatments. I was so concerned about it, that **I had considered having a facelift, but this procedure completely obviated that need.**

SYNERON  CANDELA®

Creates younger skin. Profoundly.

Profound is a revolutionary new energy-based facial treatment designed to create new elastin, collagen and hyaluronic acid – the building blocks that keep your skin smooth and elastic. All without surgery, fillers or toxins, Profound dramatically improves aging skin, so you can look years younger.

What is the effect of a lack of elastin and collagen as we age?

Starting in our mid 20's, elastin starts to break down, becoming less elastin and losing its spring. think of a lumpy mattress as the springs become old and lose their ability to recoil.

Collagen levels in skin decrease as people age.

What is the best method to build elastin and collagen?

Profound is a clinically-proven* treatment that builds elastin and collagen. By carefully heating the skin's elastin and collagen to an exact temperature for an exact amount of time, Profound leads to the creation of new elastin and collagen to repair aging skin.

What is the Profound procedure like?

Profound is a quick, single treatment performed in a physician's office, usually in 45 minutes or less. Your doctor will provide a local anesthetic to manage comfort. The system delivers precise temperatures to the deeper skin layers, exactly where the energy being delivered is most beneficial.

Is a Profound treatment right for me?

Ideal candidates for Profound are people who are seeking to reduce the signs of aging. In clinical studies, Profound treatments had a 100% response rate for wrinkles and a 95% response rate for skin laxity.**

What signs of aging can be treated with Profound?

Profound Lift

to treat sagging jowls and loose skin under the neck

Profound Contour

to define the jawline (double chins)

Profound Smooth

to treat other areas of loose skin
